

PROJECT OVERVIEW

◆ What is this project about?

- ◆ Primary project goal: Improve safety and mobility on Arapahoe Road (Waco Street to Himalaya Way)
- ◆ The project will:
 - Widen existing 2-lane roadway to 4 lanes with center turn lanes for access into and out of adjacent neighborhoods
 - Improve drainage, upgrade traffic signals, underground the overhead electric lines, and prepare this stretch of roadway for a future 6-lane section
 - Widen existing 2-lane roadway to 6-lanes at each end of the project in unincorporated Arapahoe County
 - Widen shoulder area to enhance safety through the corridor

◆ Why is it important to move forward with the project?

- ◆ The area is currently significantly congested, and studies show traffic will continue to increase in this area causing congestion and neighborhood access to worsen until the roadway is in a near constant state of gridlock. This situation could affect property values in the area, and severely limit access for emergency responders such as fire trucks, and ambulances.

ARAPAHOE - Waco to Himalaya

Overview Of Improvements
