

Go Denver App

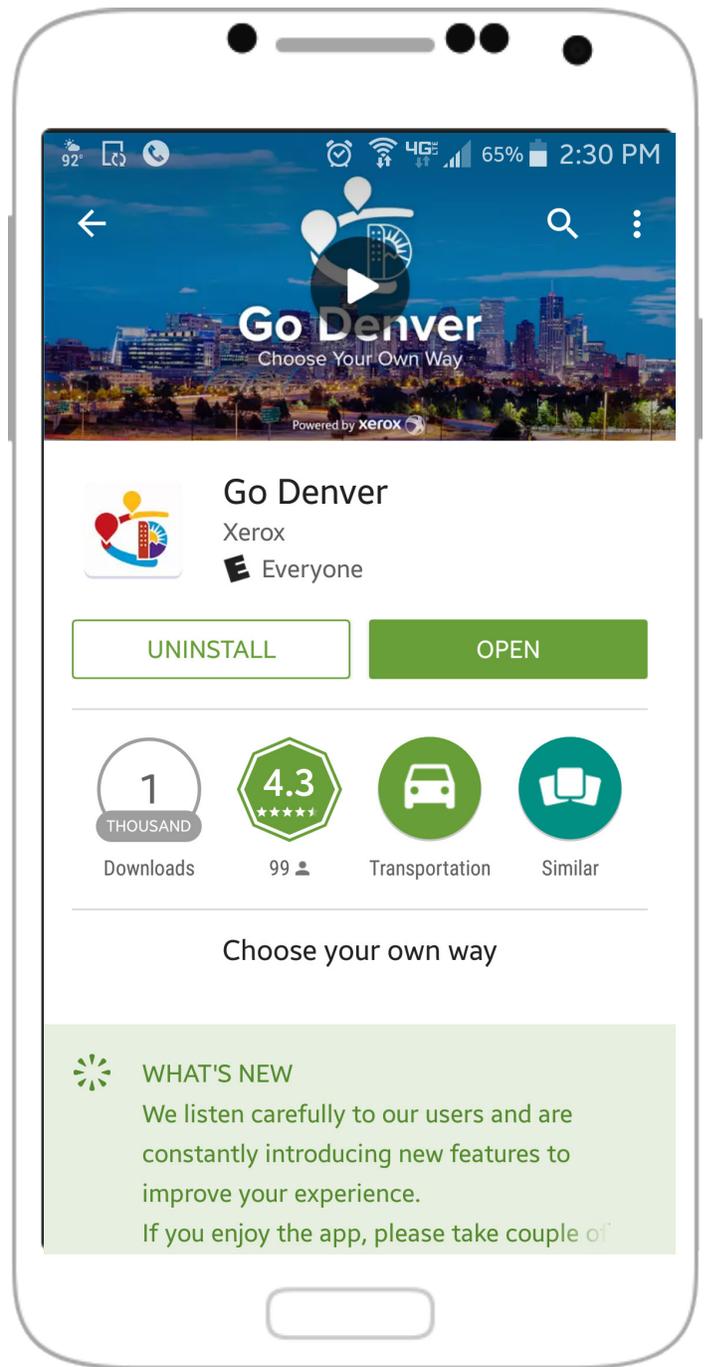

OVERVIEW

Go Denver, powered by Xerox, is an app, that lets users plan trips in the Denver Metro area from start to finish. The app will show the available transportation modes, travel times, arrival times, trip costs, calories burned and carbon emissions.

Go Denver does not provide transportation services, but it is a great resource to find the best transportation option for your individual trip.

iPhone

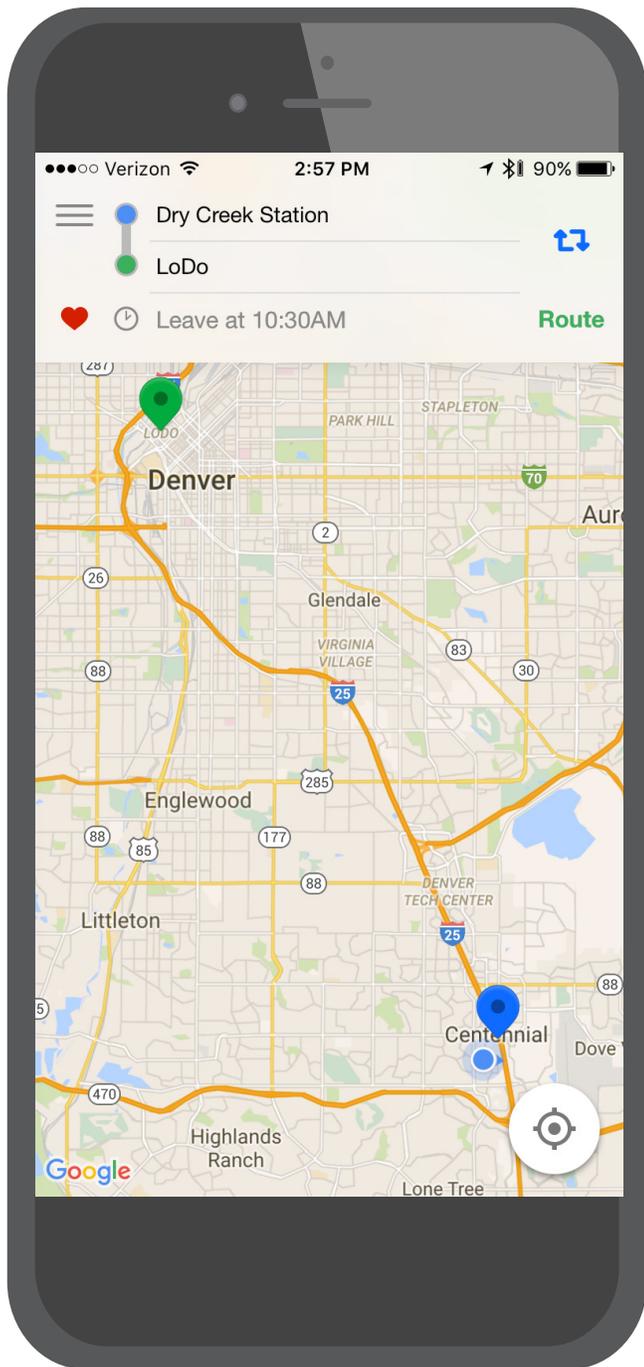

Android

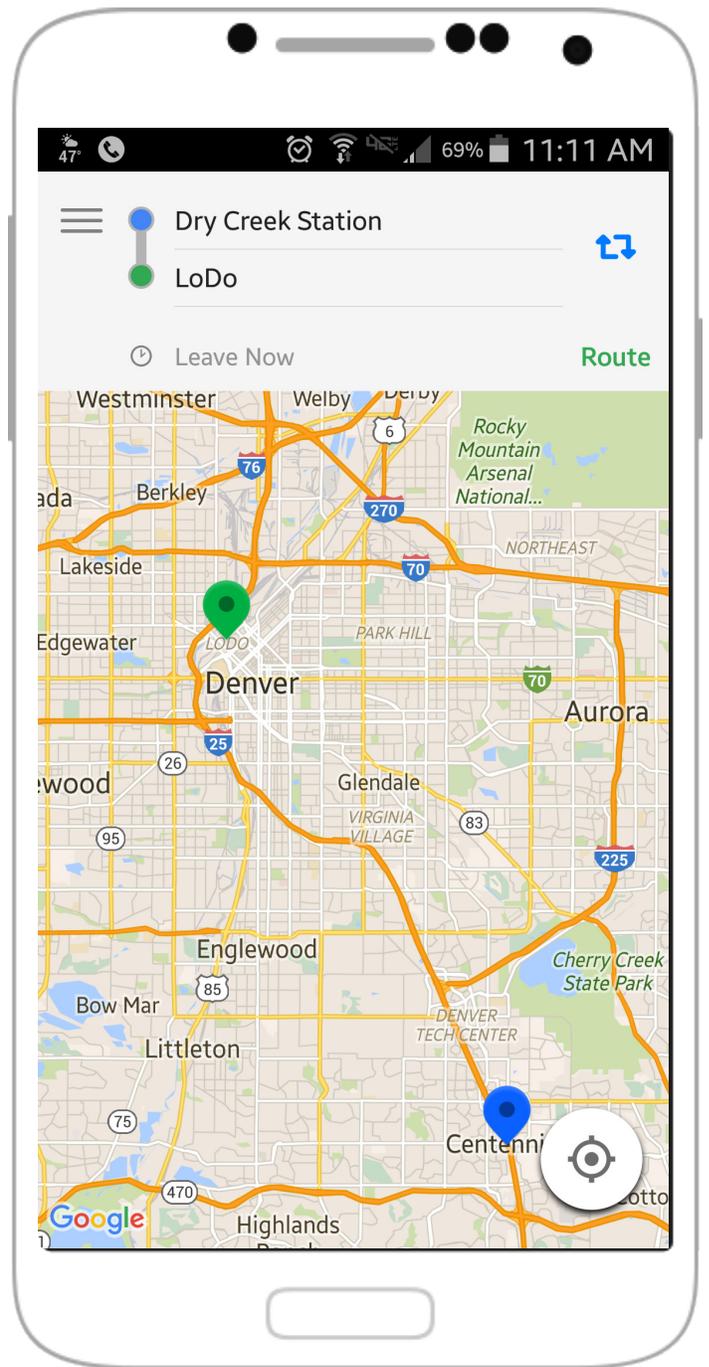

GETTING STARTED

1. Download the app from the App Store or Google Play Store.

Note: iPhones will request a password to download apps.

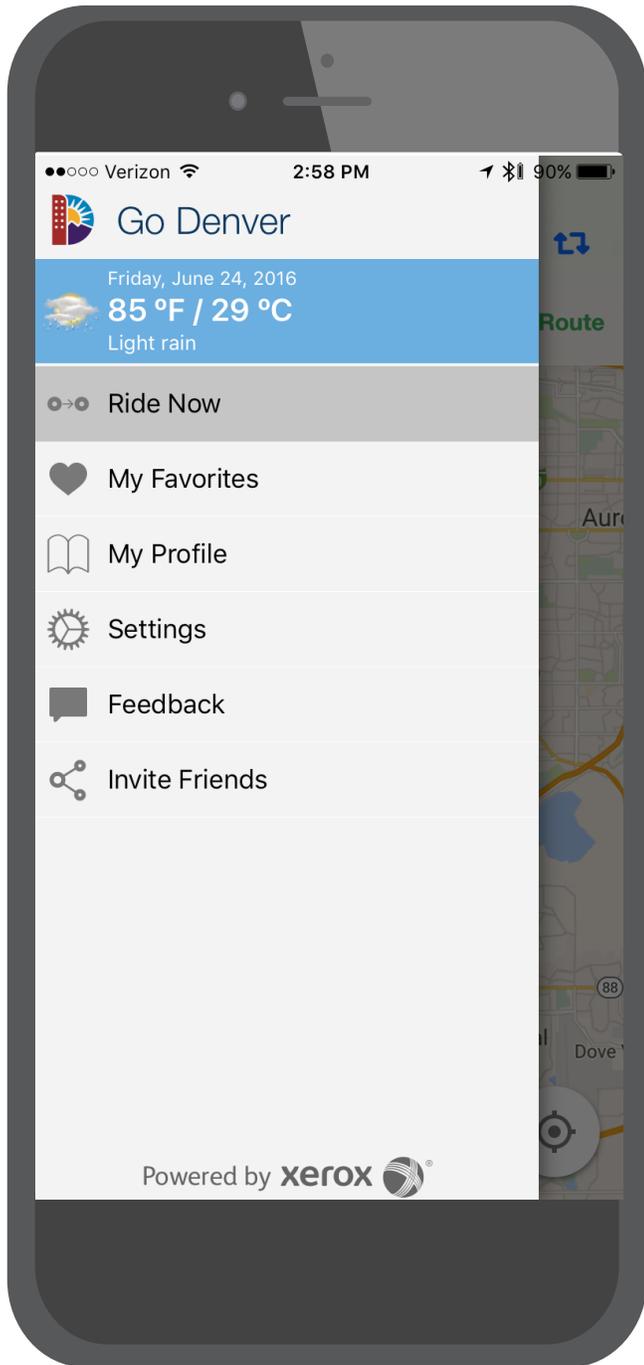

iPhone

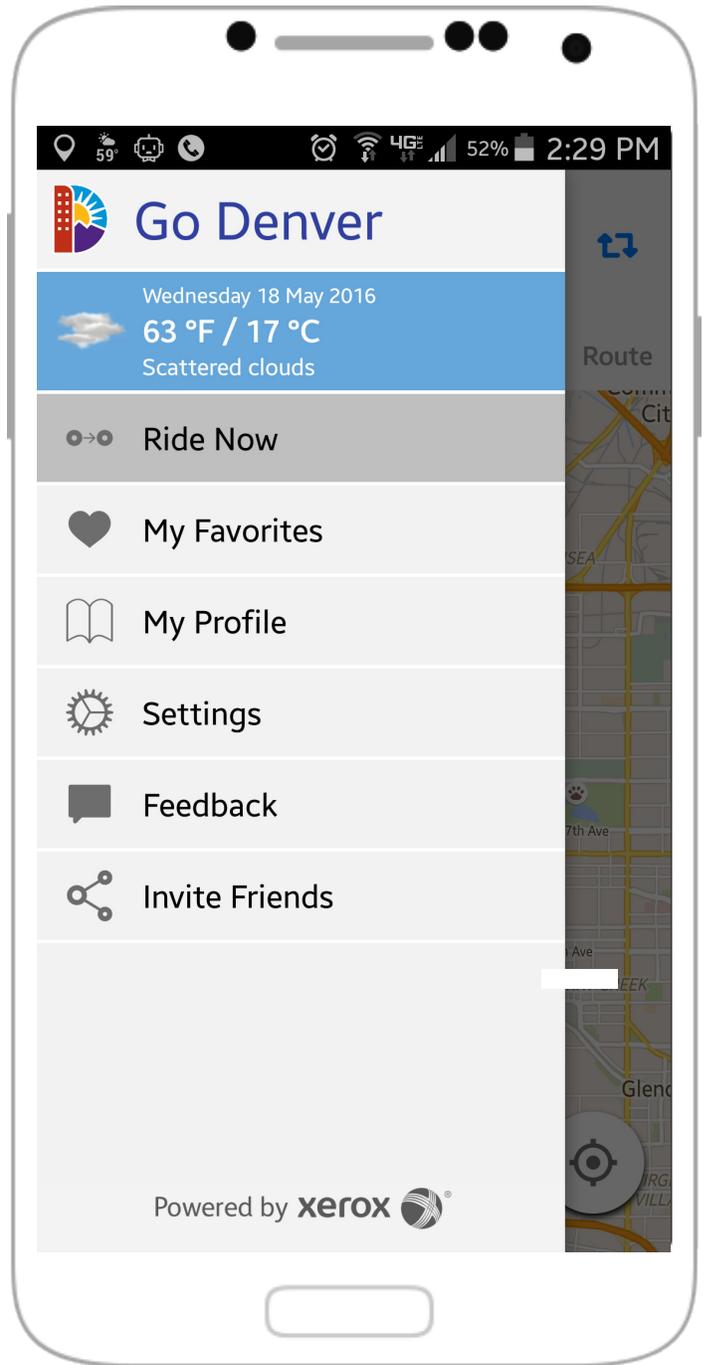

Android

2. Open the Go Denver app.

Note: You may be required to enter an email address to continue.

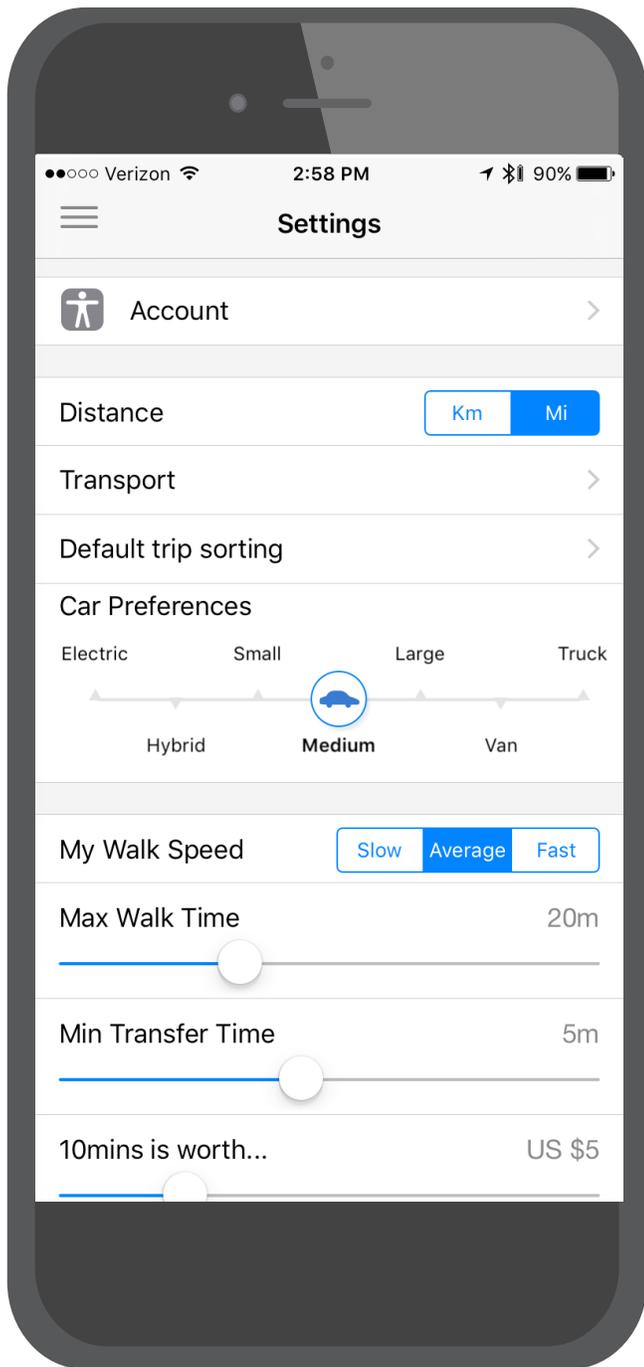

iPhone

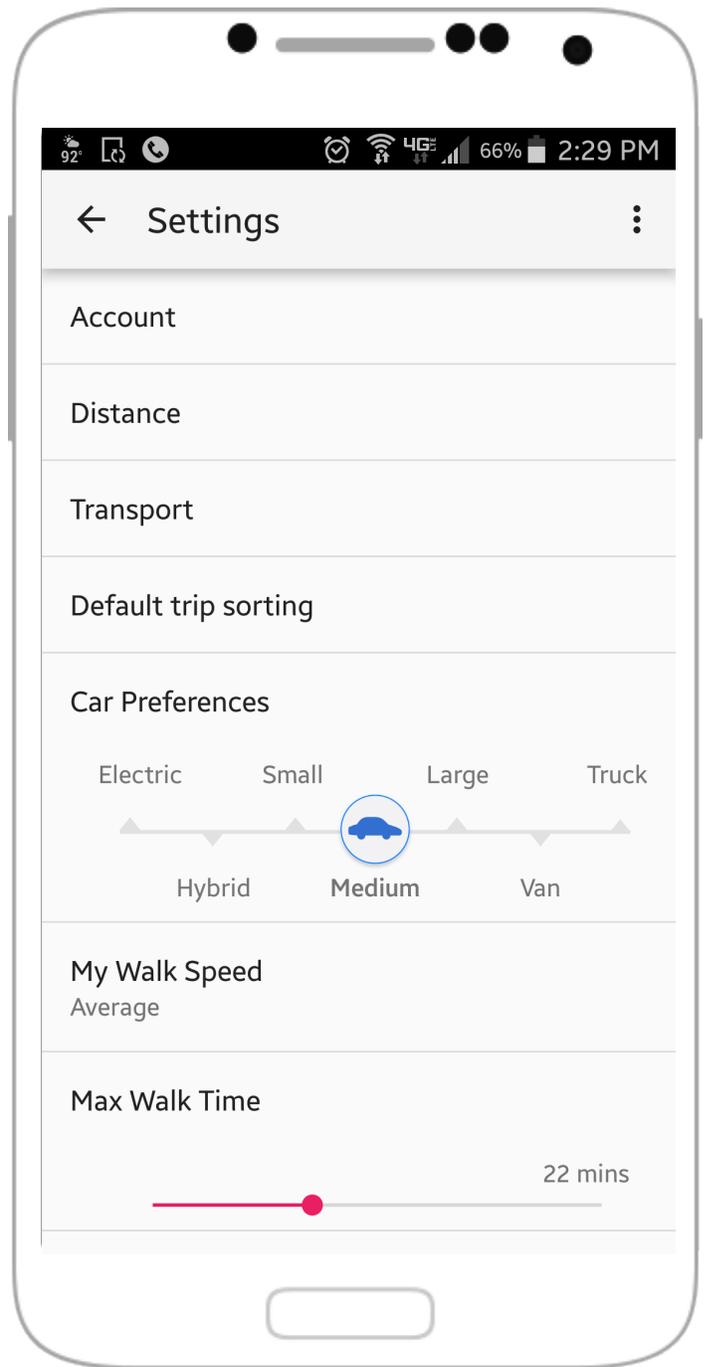

Android

3. Select the three bars in the top left corner to open the Go Denver Menu.

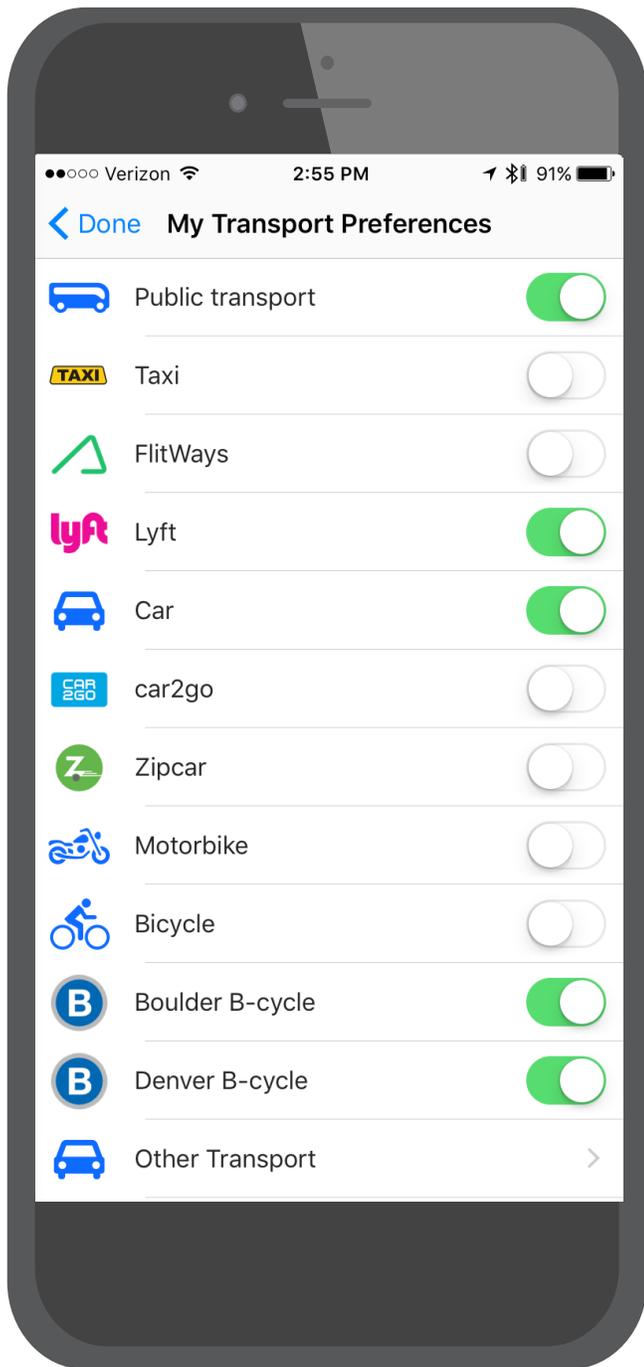

iPhone

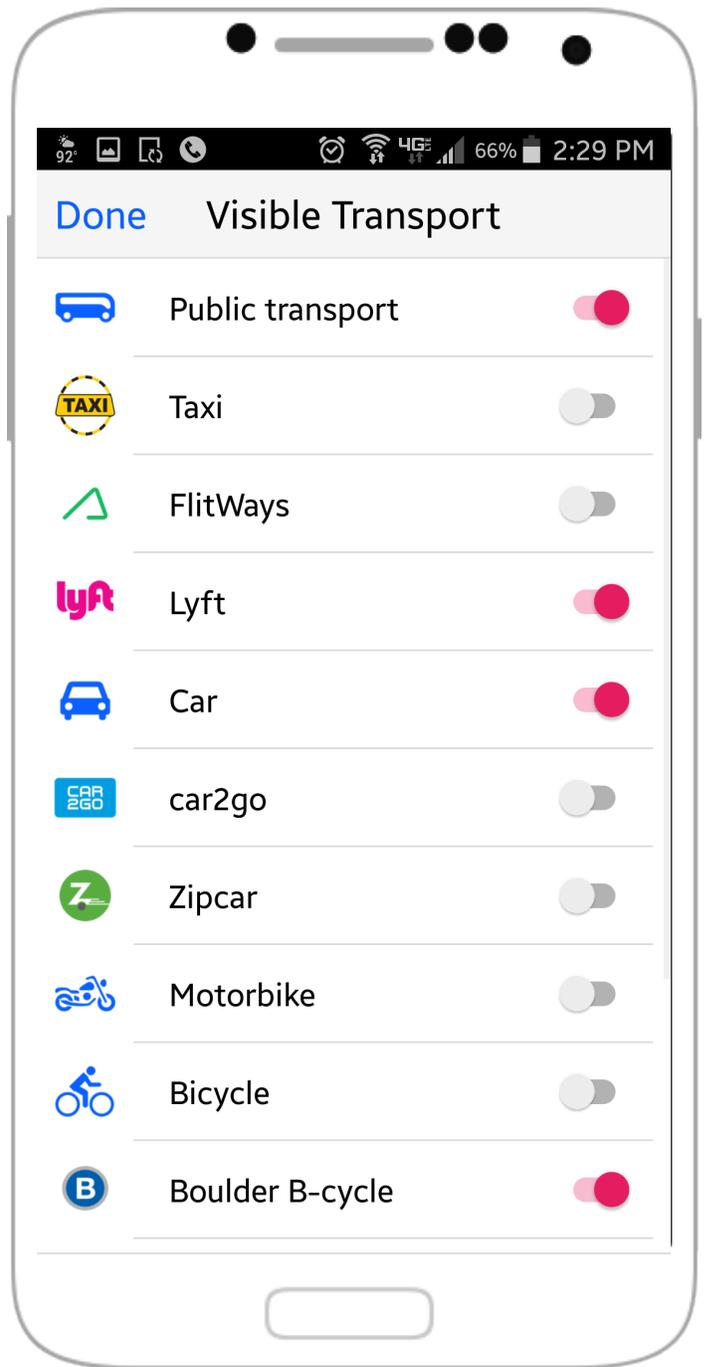

Android

4. Selecting, "Settings" will open up a menu that allows you to customize the settings to your specific needs and preferences.

For example, you may be interested in changing your walking speed and Max. Walk Time (the maximum amount of time you prefer to walk). These selections will impact the walking options Go Denver presents.

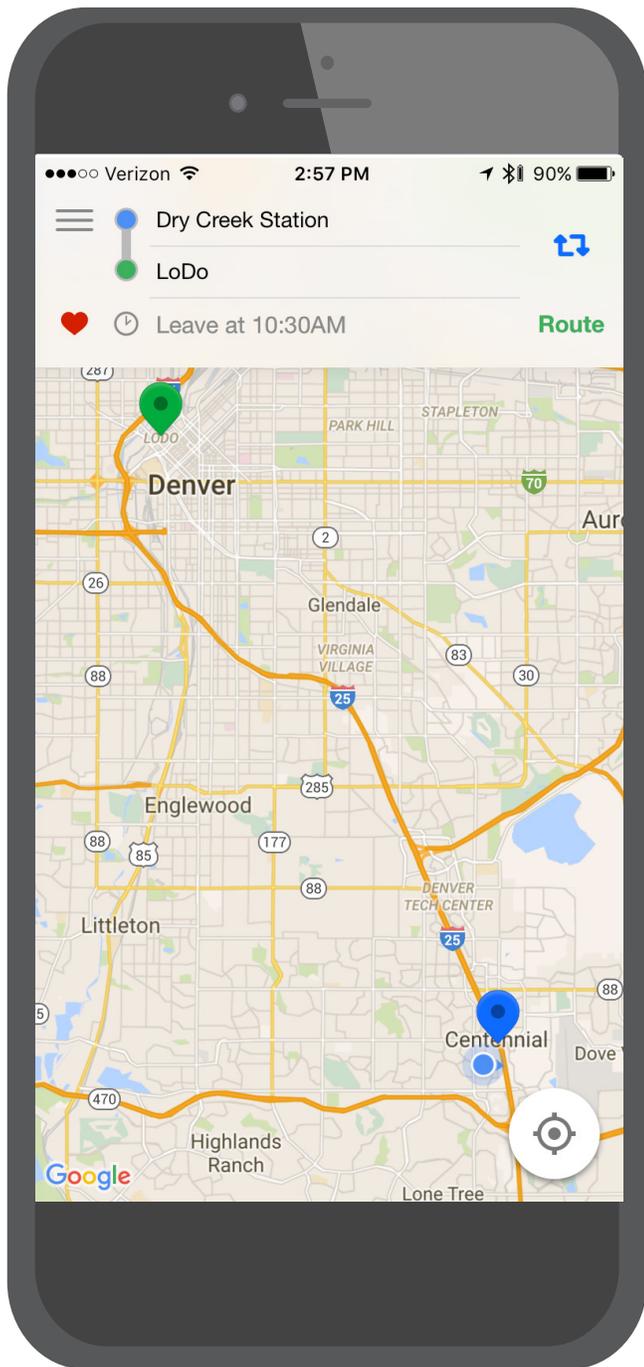

iPhone

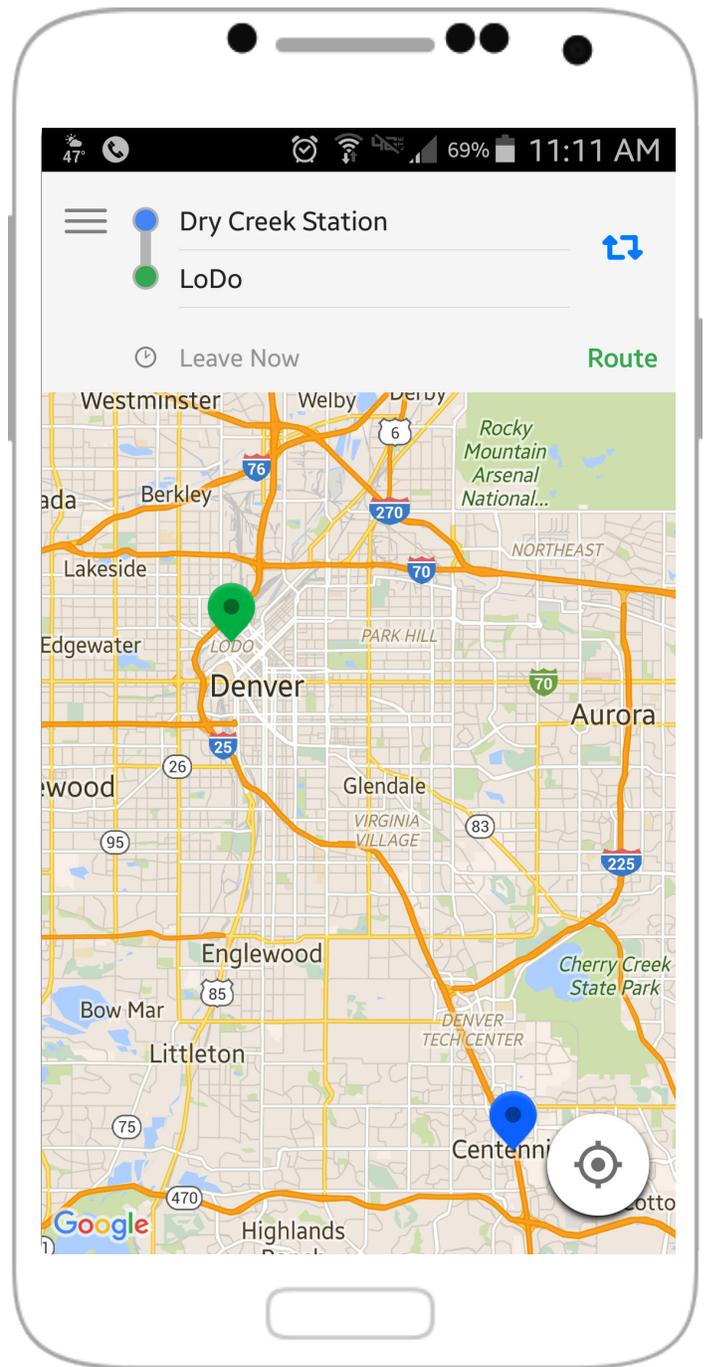

Android

5. Select, "Transport". This will open a new screen that allows you to select which modes of transit you would like the app to suggest for your use.

The options with the colored (green or pink) tabs will be included, but you will not be shown transportation modes with gray tabs.

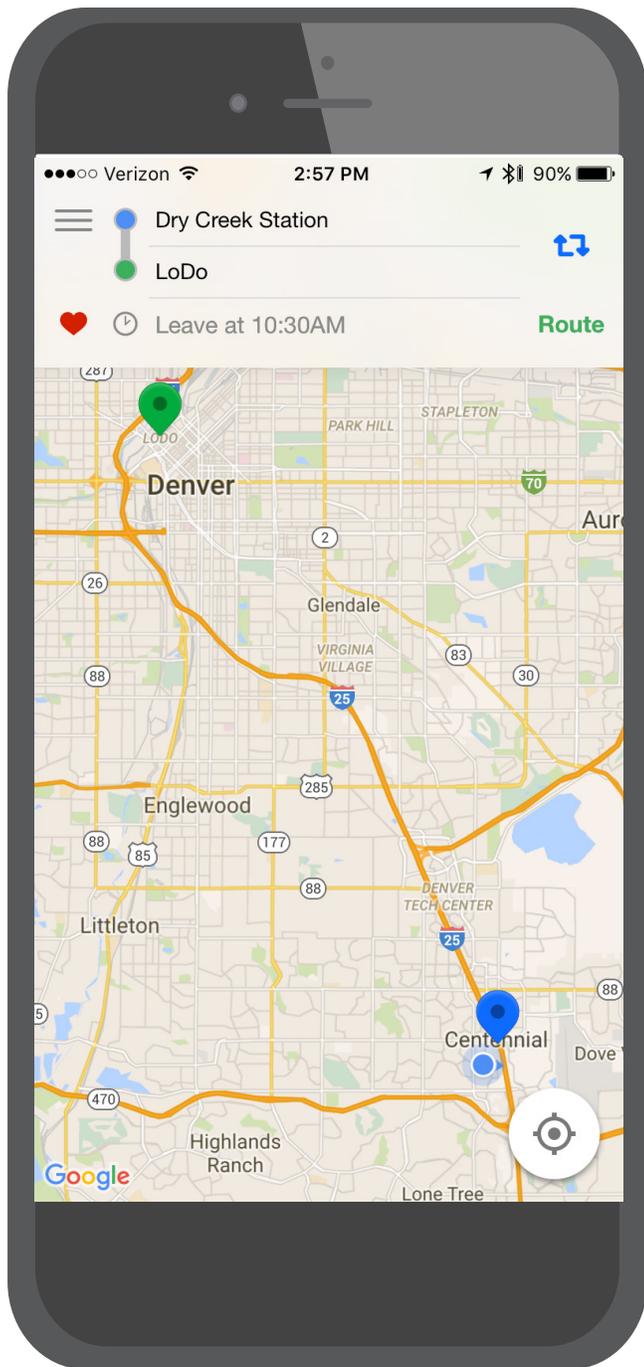

iPhone

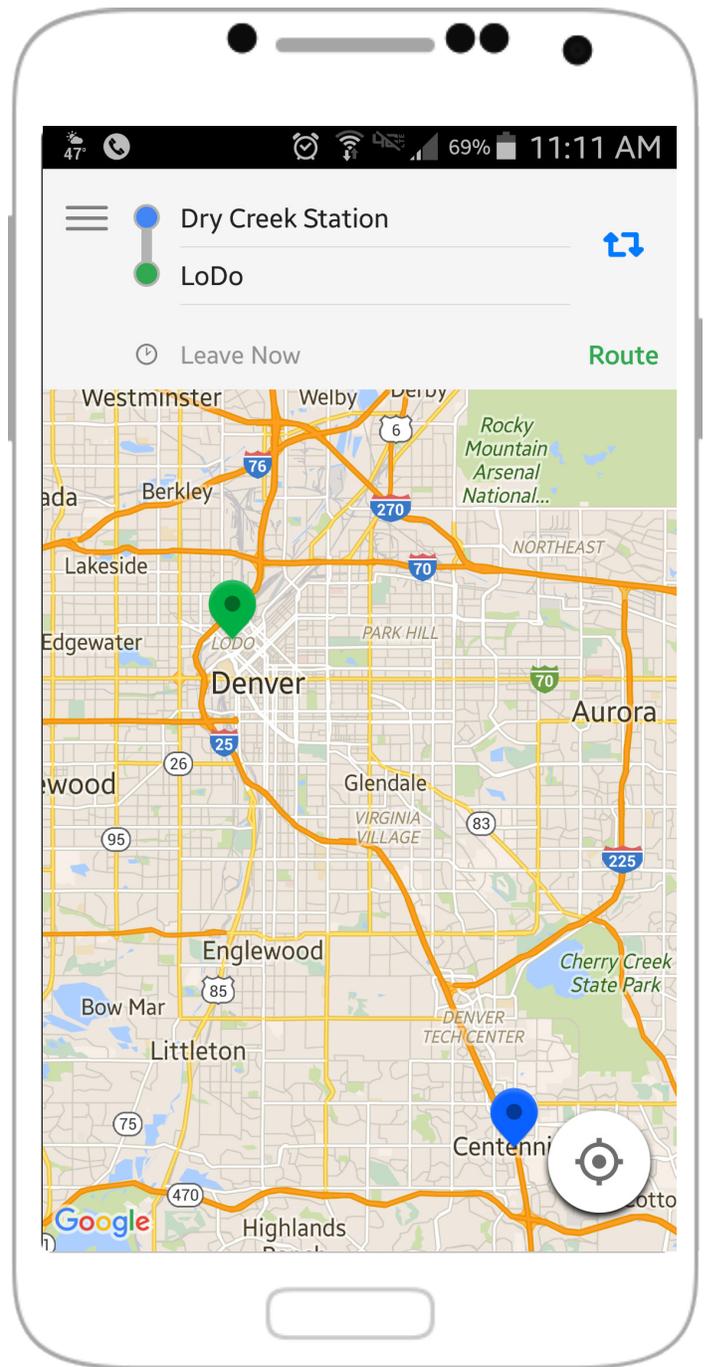

Android

6. Select, "Done", then select the back arrow at the top left to return to the "Ride Now" screen.

Android

PLANNING A TRIP

1. Identify your starting location. If your GPS is turned on, the Go Denver app will find your location automatically. Always check to make sure the location that the app has identified is correct. You may also manually type in your beginning location and end-of-trip destination addresses.

iPhone

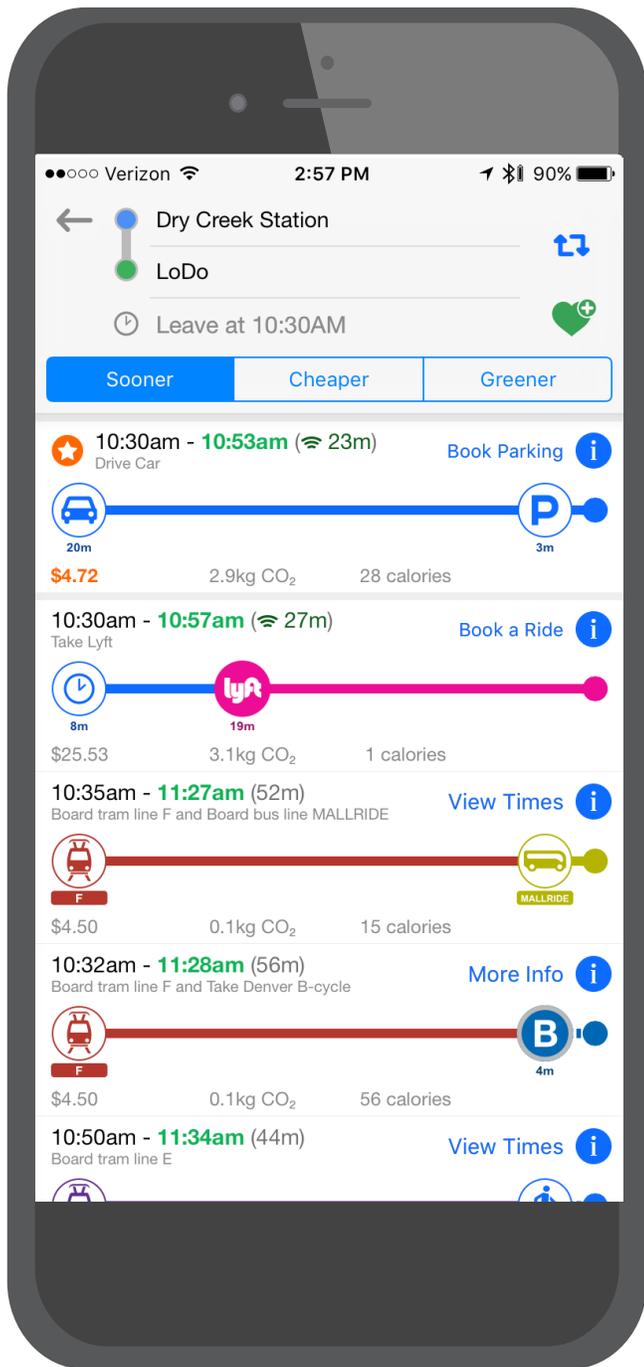

Android

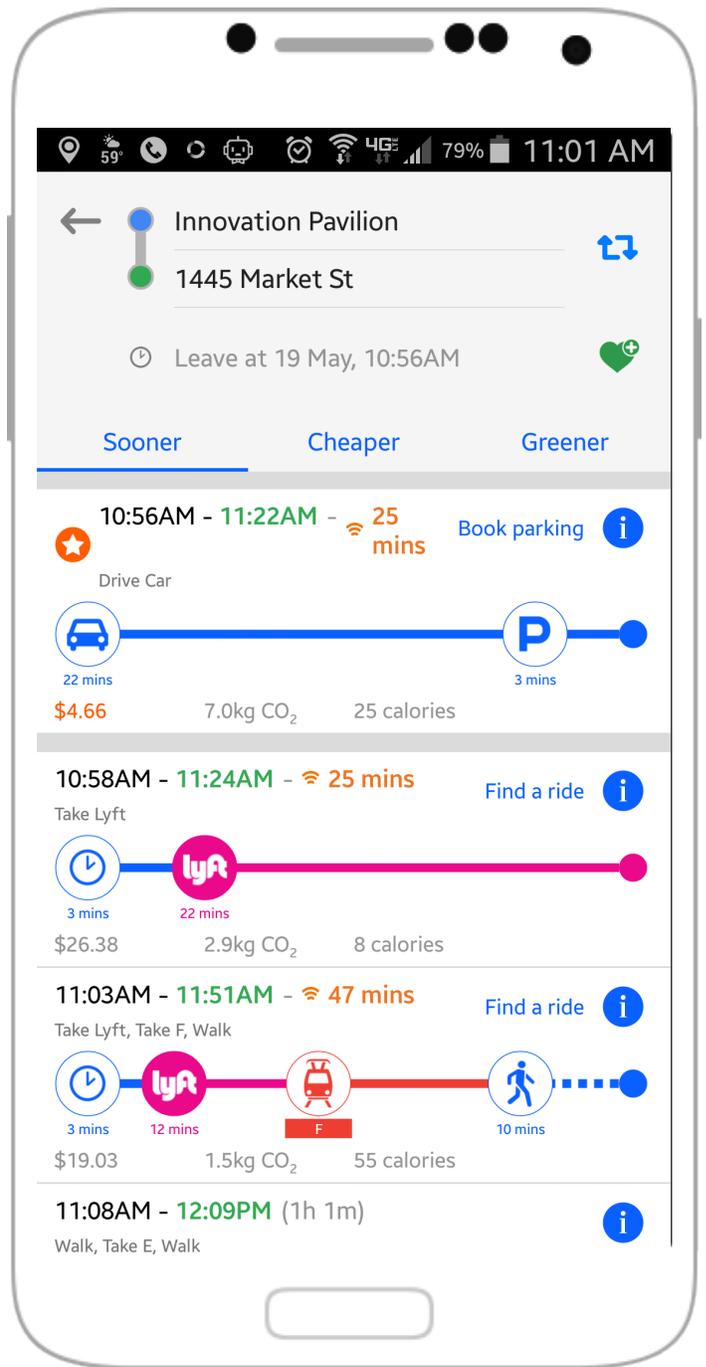

2. Select the time you'll be leaving for your trip. If you would like to plan a trip that you'll be taking in the future, select, "Leave Now" located next to the clock icon. You can then adjust the settings to the time you'll be leaving.

Here, you can set the time by either the time you would like to leave for your trip or the time you would like to arrive to your destination.

Select, "Done" to return to the "Ride Now" page.

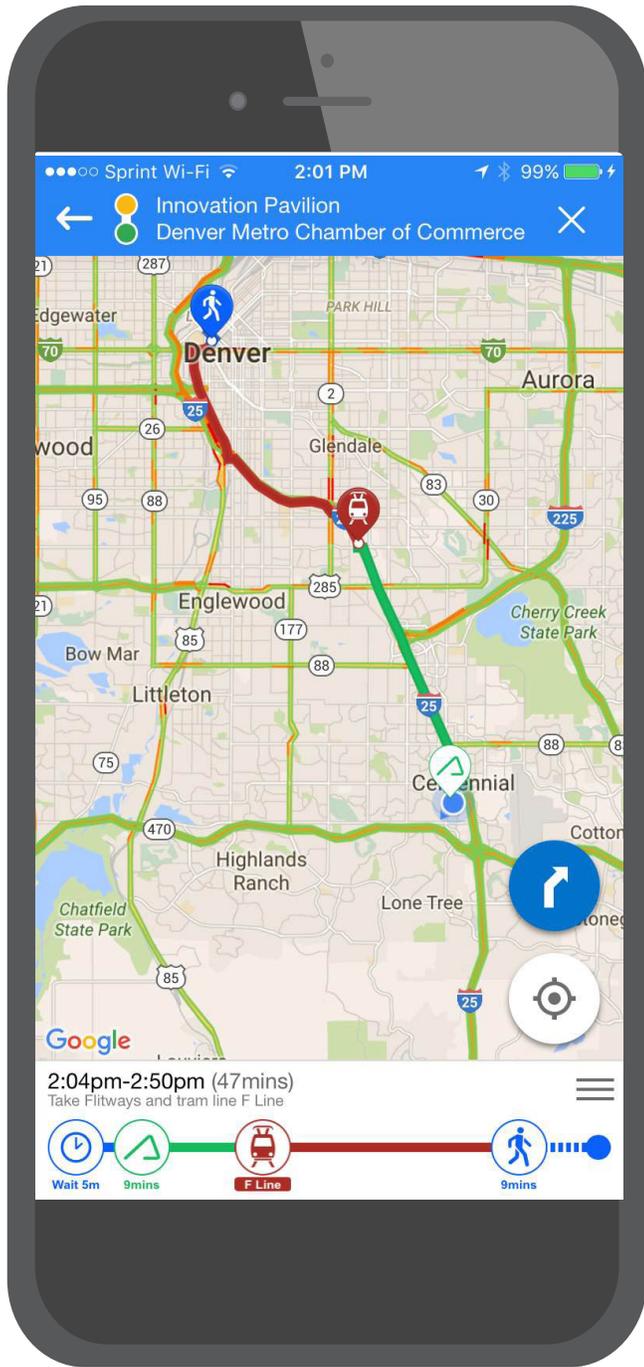

iPhone

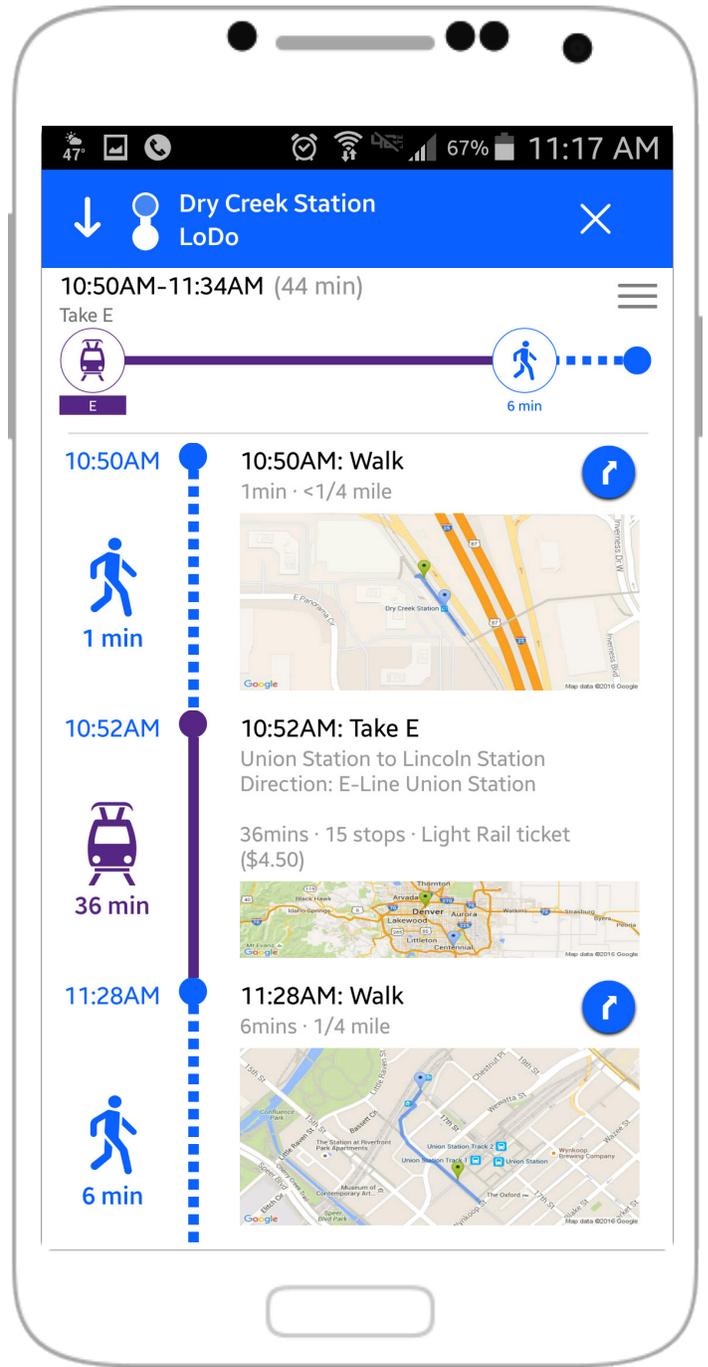

Android

3. Selecting, "Route" will bring up a list of the available transportation options.

This screen includes information on your departure time, arrival time, travel time, price, CO2 emissions and calories burned.

iPhone

Android

4. Select one of the trip options for more information.

This page will allow you to see detailed maps. Selecting the arrow by the walking map will launch a map that shows turn-by-turn walking directions.

Note: You'll need to buy a ticket at the light rail station or on the bus if you plan to take these modes.
