**December 4, 2015**

**To whom it may concern:**

**I am writing to compliment the electrical/heating inspector that came to my house on December 3, 2015 for permit number CEN-15-10337 issued 11/25/2015.**

**I was very impressed with his concern for our safety for having recently installed a new furnace and air conditioning systems. I was especially reminded of how important it is when yesterday a house about 1 block from mine was completely destroyed by a fire that started in the basement (Mineral and Nichols Dr.). Although no cause has been determined, it gave me pause to appreciate your inspector. I introduced myself to him but can't remember his name.**

**Your inspector was very thorough and hit on many safety issues involving the water heater, water pressure, proper venting, CO detectors etc. He was very knowledgeable and patient as I asked him questions. I have implemented all of his recommendations and appreciate his concern for our safety and well-being.**

**Yours truly,**
