ARAPAHOE ROAD
OVER BIG DRY CREEK
Project Need and Current Conditions

• The bridge is well past it’s prime and is starting to show signs of wear.
• Bridge deck is cracking
• The concrete on the deck underside crumbling
• Steel beams are starting to show wear
Current Conditions

• Arapahoe Road narrows down from both directions before crossing the bridge
Current Conditions

• Lack of adequate pedestrian facilities
• Staircase is the only access to Big Dry Creek Trail
Proposed New Bridge Section
• Current median prohibits traffic access to the dual left-hand turn lanes, which causes backups on the insides through lane.

• The narrower median will allow earlier access traffic turning onto southbound University Boulevard.
New Trail Connection to Big Dry Creek
Draft Rendering of Preliminary Design (subject to change)
